It is dangerous to believe that a system as complex as a drug wholesaler can operate efficiently without systematic controls in place. Likewise, there is no last minute opportunity to prepare for an event as important as a State Board of Pharmacy inspection. The profession of drug wholesaling, by its nature, is fraught with risk on its best day. Consistent diligence is the only true path to compliance.

Once the Board of Pharmacy inspector arrives at your facility and announces a site inspection, the time is long past to think about preparation. Prior planning will avert confusion at the outset of the inspection and avoid making a long day even longer. With the help of Rx Licensing Solutions, our *Wholesaler License Protection Handbook* and our Q&A Forum will not only save you time in preparing for the inspection, but we will also inspire confidence that your operation is orderly, focused, and practicing under the laws regulated and enforced by the State Board of Pharmacy.

"My staff and I are very happy and grateful for Rx Licensing Solutions. Keeping up on regulatory matters, including P&P's, is very difficult in our busy wholesale business. Utilizing the services of Rx Licensing Solutions has rectified this problem. Not only is their service professional, but also having two pharmacists, with one an attorney, only a phone call away is valuable in itself. In addition to staying compliant with the State Board of Pharmacy, their assistance in procuring out-of-state wholesaler permits has helped us to expand our business across state lines. Thank you for all your help. We are glad to have signed up with your services." Mohammad Salemi, Burbank CA
